EXPERIENCE

Zitko Group — *Senior Infrastructure Technician*

SEPTEMBER 2024 - PRESENT

Changed contracts to continue delivering solutions for the IT Infrastructure teams at Snap, Inc.. Designed novel workflows relating to maintenance alerting, network performance analysis, and site upkeep. Wrote scripts primarily in bash and javascript to simplify hardware lifecycles.

Regent Technology Solutions — *Site Reliability Engineer*

FEBRUARY 2021 - SEPTEMBER 2024

Delivered a wide range of solutions for the IT Infrastructure teams at Snap, Inc.. Improving internal monitoring tools (Solarwinds, Infoblox, Opengear), out-of-band management capabilities, and detailed network rack inventory tracking.

HLW International — *IT Help Desk Technician*

JULY 2019 - JANUARY 2021

Implemented new ticket tracking software (Jira) across six departments in the organization, used Powershell to clean up Active Directory and Microsoft Exchange databases, and alleviated critical technical debt.

PROJECTS

BASE — *A web-app built in Google Sheets*

Using the Apps Script engine, I was able to launch an internal tool for my team. This app allowed my teammates to have a centralized solution for building equipment orders, creating rack elevations, and managing site workbooks.

CConfig — *A bash script for simplified configurations*

A script that initially started as a few simple 'sed' commands that eventually evolved into an interactive interface for generating configs for 4 different device types, pre-defined SNMP scans, and login verification.

SKILLS

Automation/Scripting
Multi-OS Proficiency
Network Configuration
Javascript
Powershell
Python
JIRA Administration
