Connor Sellman

Infrastructure Engineer | Snap, Inc. | London, UK

connorsellman@gmail.com | +44 07367 285803 | csellman.com | LinkedIn

Infrastructure Engineer delivering EMEA projects, managing asset lifecycles, and deploying internal cloud services. Combines hands-on engineering with automation, documentation, and collaborative delivery.

EXPERIENCE

Snap, Inc. | Infrastructure Engineer — April 2026 - Present

London, UK

- Coordinate EMEA infrastructure projects, aligning deployment plans, vendors, and engineering teams.
- Manage asset lifecycles from deployment and inventory tracking to maintenance and decommissioning.
- Standardise documentation and automate repeatable workflows to improve day-to-day operations.
- Deploy internal application services on Google Cloud Platform (GCP) and Amazon Web Services (AWS).
- Deliver office networks with network, AV, security, and project teams, maintaining accurate site documentation.

Zitko Group | Senior Infrastructure Technician — September 2024 - March 2026

Santa Monica, CA, USA

- Continued supporting Snap's IT infrastructure teams through a contract transition.
- Built workflows for maintenance alerts, network performance analysis, and site upkeep.
- Automated hardware lifecycle tasks with Bash and JavaScript.

Regent Technology Solutions | Site Reliability Engineer — February 2021 - September 2024

Santa Monica, CA, USA

- Improved Snap's infrastructure monitoring with SolarWinds, Infoblox, and Opengear.
- Enhanced out-of-band management and network rack inventory tracking.

HLW International | IT Help Desk Technician — July 2019 - January 2021

Santa Monica, CA, USA

- Introduced Jira ticket tracking across six departments.
- Automated Active Directory and Microsoft Exchange database cleanups with PowerShell.
- Reduced technical debt through infrastructure improvements and clearer process documentation.

PROJECTS

BASE | Infrastructure Operations Platform

Designed and developed BASE, an internal infrastructure operations platform that centralises equipment order management, rack elevations, site documentation, and inventory tracking. Originally built with Google Apps Script, the application has since been migrated to Google Cloud Platform (GCP), with integrations spanning AWS and external cloud services to connect infrastructure workflows with inventory data.

SquareOnePM | Property Management Web Application

Designing and developing a website and property management web application for a family-run company. Building dedicated Staff, Owner, and Resident portals to manage invoices, rentals, communications, payments, reporting, documents, and maintenance across multiple properties.

CConfig | Bash Configuration Tool

Developed an interactive Bash tool for generating configurations for multiple device types, running predefined SNMP scans, and verifying device logins. Evolved a set of sed commands into a guided interface that simplifies repeatable configuration tasks.

SKILLS

Infrastructure Project Coordination	Asset Lifecycle Management	Network Configuration
Multi-OS Proficiency	Cloud Services / GCP & AWS	Automation / Scripting
JavaScript	PowerShell	Python
Technical Documentation	Jira Administration
